# NATIONAL MUSEUMS OF CANADA MUSEES NATIONAUX DU CANADA

## PUBLICATIONS

List of Publications

The publications issued by the National Museum of Canada cover various branches of geology, biology and anthropology. The subjects most frequently dealt with are: (1) taxonomy and distribution of Canadian plants and animals; (2) the extinct vertebrate animals of Canada; (3) records of the prehistoric inhabitants of Canada (archaeology); (4) culture and traditions of the aboriginal and immigrant people of Canada (ethnology, folklore).

The Museum was for many years closely associated with the Geological Survey of Canada. Numerous geological reports appeared in the Museum Bulletins, and some works which would now be considered strictly Museum were published in the Memoirs of the Geological Survey. All of these are listed here.

The sale of Canadian Government publications is the responsibility of the Queen's Printer, and all of the publications in this list that are still available may be obtained from that source. Unless otherwise indicated, they can also be obtained from the National Museum. Bulletins in the Geological Series prior to Bulletin No. 145 should be ordered from the Geological Survey of Canada. These addresses are as follows:

The Queen's Printer,  
Ottawa, Ontario.

The National Museum of Canada,  
McLeod and Metcalfe Streets,  
Ottawa, Ontario.

The Geological Survey of Canada,  
601 Booth Street,  
Ottawa, Ontario.

Prices charged for these publications are generally less than the actual cost of printing. Government regulations require payment in advance. Remittance should be in Canadian funds, preferably by Postal Money Order payable to the Receiver General of Canada. Postage stamps are not acceptable.
